

Tire repair kit manual

1. *Screw the plug tool into the wrench block.*

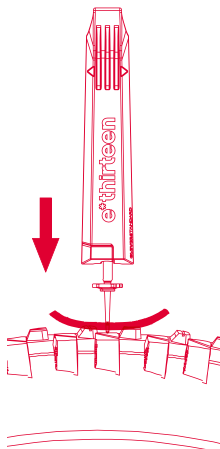

Clamp the wrench block between the tire levers.

Slide the metal disc onto the plug tool.

2. *Place the tire plug into the hook and push the plug into the tire hole.*

Push the hook all the way down till the metal disc touches the tire.

3. *Secure the metal disc with your fingers and slide the hook out.*

Cut the plug ends with the knife.
