

TSB# 124

# TECHNICAL SERVICE BULLETIN

**Products included in this TSB:**

- TRS fatbike cranks included on the Specialized Fatboy Expert

**TSB intended for:**

Distributors  
Dealers  
End users

**Abstract:** The Specialized Fatboy Expert comes stock with TRS fatbike cranks. This bike uses a pressfit 30 BB shell adapted for the 100mm fatbike spindle. Due to the width of the BB shell, this bike cannot use our standard PF30 bottom bracket that threads together.

**Do not** use BB part number BB.PF30.K or BB.PF30P.K on this bike

**Do** use BB part number BB.PF30.PRS.K on this bike

**Identifying the issue:** BB.PF30.PRS.K should be used on the Specialized Fatboy and Fatboy expert and on any PF30 fat bike application in place of our standard PF30 BB. This press in BB should be used rather than the thread together BB.

**Recommended action:** Use BB part number BB.PF30.PRS.K for fat bike PF30 applications.
