ALL TERRAIN ADVANTAGE

NEW CASINGS, BETTER COMPOUNDS, LONGER WEARING, FASTER ROLLING.
Without compromising traction, the new All-Terrain tire rolls faster and wears better, with more supple casings and updated compounds.

KNOB PITCH

27.5": 100

29": 106

BIGGER CENTER KNOBS

Higher-volume center knobs with deeper siping roll better and bite harder.

ROUNDER PROFILE

Better transition and cornering for all types of riders.

SHORTER SIDE KNOBS

More rounded profile, with accordion siping and arched cutaways for predictable loading.

CASINGS

TRS: Lighter-weight trail casing with cut protection.

LG1 EN: Supple, dual-ply enduro casing with excellent cornering support and cut protection.

LG1 DH: Durable dual-ply casing, with maximum puncture protection and cornering support.

APEX

Maximum cut protection at the bead and sidewall. Apex inserts also allow the tread cap to better conform to uneven terrain, resulting in more grip and lower rolling resistance in most conditions.

DUAL COMPOUNDS

PLUS: Tacky tread compound with a harder base compound for better tread wear and faster rolling.

RACE: High-tack, slow rebound side knobs with better wearing, faster rolling center knobs.

MoPo: Ultra high-tack, slow rebound tread, with a harder base for better tread wear and faster rolling.

ARAMID

Woven reinforcement on Race models better protects against punctures, and increases air retention.

CASINGS							
TRS	Lightweight trail casing.						
LG1 EN	Supple, yet durable race-ready enduro casing with excellent cornering support and cut protection.						
LG1 DH	Durable dual-ply casing, with maximum puncture protection and cornering support.						
TECHNOLOGY							
APEX REINFORCEMENT	Maximum cut protection at the bead and sidewall. Apex inserts also allow the tread cap to better conform to uneven terrain, resulting in more grip and lower rolling resistance in most conditions.						
ARAMID REINFORCEMENT	Woven reinforcement on Race models better protects against punctures, and increases air retention.						
NYLON BREAKER	"Breaker Ply" under the tread cap for additional puncture resistance.						
COMPOUND COMBO							
PLUS	Tacky tread compound with a harder base compound for better tread wear and faster rolling.						
RACE	High-tack, slow rebound side knobs with better wearing, faster rolling center knobs.						
MOPO	Ultra high-tack, slow rebound tread, with a harder base for better tread wear and faster rolling.
